Aircraft Restoration
Cultivating the Next Generation Through Aviation

Letter of Understanding

Purpose of the 88CHARLIES Program

The mission of 88CHARLIES is to use the empowering experience of restoring and flying vintage airplanes to teach young people responsibility, leadership, planning, and teamwork. It is our goal to motivate students to expand their knowledge of aviation, science, technology, engineering, mathematics, and history through aircraft restoration.

Reward of Flight Training Hours

1. Students shall be a minimum of 12 years of age to earn Flight Credits.
2. 88CHARLIES will award an introductory flight to an enrolled student after the completion of 20 hours of approved work under the direction of an 88CHARLIES Member or Director. The work shall be recorded and verified by an 88CHARLIES Founder prior to starting any flight time.
3. After the student has completed the initial 20 hours, an additional hour of Flight Credit will be awarded to the student for 20 hours of project work or assignments issued by an 88CHARLIES Director.
4. Flight Credits shall expire 6 months after the student graduates from high school.
5. For those students using their Flight Credits toward flight training, the following applies:
 - a. This program will provide up to 60 hours of flight training for the student to obtain a Pilot Certificate. The student is required to pass their FAA Written Exam prior to the completion of 15 hours of flight time.
 - b. **Flight training will stop at 15 hours until the student has passed the FAA Written Exam.** This program is designed to aid students in acquiring a Pilot Certificate. Passing the Ground School Written Exam with the FAA is a vital part of the certification process. It is important the student be diligent in the early training process to complete the FAA Written Exam.
 - c. Certified Flight Instructors approved by 88CHARLIES will perform all flight instruction
 - d. The minimum age for the initiation of flight instruction is 15 years.
 - e. Flight training will be available to the completion of the Private Pilot Certification, or a maximum of 60 hours.

Letter of Understanding (Continued)

Ground School Recommendations

1. Take a ground school course through 88CHARLIES Inc. or another professional training organization.
2. The King School course on disk is a great option, however it takes much commitment to stick with it and complete it in a timely fashion.
3. Gleim books offers a great book with practice tests that act as a beneficial study aid for the FAA Written Exam.
4. Start early, team up with other companions and study together.
5. Ask your Flight Instructor for the best way to study and pass the FAA Written Exam. The written exam is the most grueling part of earning the Pilot Certificate. Passing the exam early gets the tough part out of the way.
6. Many tasks are involve din learning to fly aircraft. Lessons proceed first with a short review of what was learned in their previous lessons. If you preform well and remember the tasks, then the Flight Instructor will move on to new lessons and subjects. If you do not fly often, for example a minimum of an hour a week, much of the skill you have practiced on the previous lesson may be lost. This results in more review of the last lesson and less new learning material. Attempt o fly at least on hour a week; it will not only speed our education, you will enjoy it much more as well.

I have read the above requirements for 88CHARLIES Inc. participation and Flight Program, and understand the information.

Code of Conduct Agreement

I alone am responsible for my behavior at all 88CHARLIES Inc. functions. I understand that each participant has the privilege to learn about aviation and to enjoy all 88CHARLIES activities. Each 88CHARLIES Mentor and Parent has the privilege to instruct, lead, and learn at all 88CHARLIES functions. In order to make sure these privileges are observed, I agree to the following:

1. I will follow all directions promptly and respectfully.
2. I will not disturb others.
3. I will treat all others with proper respect at all times.
4. I will not say disparaging things about other participants or mentors, or use profanity.
5. I will respect the personal equipment and property of others.
6. I will respect 88CHARLIES Inc. equipment.

When I follow these rules, my fellow participants and I will benefit from, and enjoy the 88CHARLIES aviation experience.

Failure to follow these rules will result in the following consequences:

- 1st I will be warned.
- 2nd I will be removed from the activity.
- 3rd I will be sent home from the activity.
- 4th I will not be allowed to attend other activities.

If I commit any of the following infractions, I will replace or repair the damaged, destroyed or missing equipment at my own cost:

1. Items stolen (no matter how small or inconsequential).
2. Other's personal property, damaged or destroyed (intentional or accidental).
3. 88CHARLIES equipment, damaged or destroyed through neglect.

I have read and understood the above contract and agree to follow the rules.
